Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

-!- FUNCTION: NUMB IS REQUIRED IN DETERMINATION OF CELL FATE DURING SENSORY ORGAN FORMATION IN DROSOPHILA EMBRYOS. IT FUNCTIONS IN NUCLEI AND SEEMS TO INTERACT WITH NUCLEIC ACIDS.

-!- SUBCELLULAR LOCATION: NUCLEAR.

-!- SIMILARITY: CONTAINS 1 PID DOMAIN.
                                                                                                                                                                                                                                           N-LINKED (GLCNAC. . .) (POTENTIAL).

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             LINE CELLS. PLAYS A ROLE IN GERM LINE SEX DETERMINATION.
SUBCELLULAR LOCATION: NUCLEAR (POTENTIAL).
DEVELOPMENTAL STAGE: FIRST APPEARS IN THE GERMARIUM AND
ACCUMULATES IN NIRES CELLS DURING OGGENESIS. STORED IN THE EGG,
BUT IS RAPIDLY LOST IN THE EMBRYOS EXCEPT FOR ITS CONTINUED
PRESENCE IN THE GERM LINE PRECURSOR POLE CELLS.

Mol. Phylogenet. Evol. 15:157-164(2000).
''- FUNCTION: COMPONENT OF THE UBIQUINOL-CYTOCHROME C REDUCTASE
COMPLEX (COMPLEX III OR CYTOCHROME B-C1 COMPLEX), WHICH IS A
RESPIRATORY CHAIN THAT GENERATES AN ELECTROCHEMICAL POTENTIAL
COUPLED TO ATP SYNTHESIS (BY SIMILARITY).
'-- COFACTOR: TWO HEME GROUPS (ES52 AND B566) WHICH ARE NOT COVALENTLY
BOUND TO THE PROTEIN (BY SIMILARITY).
-- SUBUNIT: THE MAIN SUBUNITS OF COMPLEX B-C1 ARE: CYTOCHROME B,

                ALTERNATIVE FRODUCTS: 8 ISOFORMS: PACE4A.1/PACE4 (SHOWN HERE),
PACE4A-II, PACE4B/PACE4.1, PACE4C, PACE4CS, PACE4D, PACE4E-I AND
PACE4A-II, ARE PRODUCED BY ALTERNATIVE SPLICING. ISOFORMS PACE4B,
C, CS AND D MIGHT BE ENZYMATICALLY INACTIVE.
TISSUE SPECIFICITY: EACH PACE4 ISOFORM EXHIBITS A UNIQUE
RESTRICTED DISTRIBUTION, PACE4A-I IS EXPRESSED IN HEART, BRAIN,
COMPARATIVELY HIGHER LEVELS IN THE LIVER. PACE4A-I IS AT LEAST
EXPRESSED IN PLACENTA. PACE4B WAS ONLY FOUND IN THE EMBRYONIC
KIDNEY CELL LINE FROM WHICH IT WAS ISOLATED. PACE4C AND PACE4D ARE
PLACEMENTAL PACEAE-I IS EXPRESSED IN CEREBELLUM,
PLACEMENTA. PACE4E-I IS EXPRESSED IN CEREBELLUM,
PLACEMENTA. PACE4E-I IS EXPRESSED IN CEREBELLUM,
                                                                                                                                                                                                                                                                     PROPEPTIDE CLEAVAGE AFFECTS ITS TERTIARY OR QUATERNARY STRUCTURE.
- SUBCELLULAR LOCATION: PACEAA-I AND PACEA-AII ARE SECRETED. PACEACC.
AND PACEACS ARE NOT SECRETED AND REMAIN PROBABLY IN ZYMOGEN FORM.
IN ENDOPLASMIC RETICULUM. PACEAE-I AND PACEAGE-II ARE RETAINED
INTRACELLULARLY PROBABLY THROUGH A HYDROPHOBIC CLUSTER IN THEIR C-
                                                                                                                                           AND CAPABLE OF CLEAVAGE AT THE RX(K/R)R CONSENSUS MOTIF.

1-1-CATALYTICA GATTYLTY: RELEASE OF MATURE PROTEINS FROM THEIR
PROPROTEINS BY CLEAVAGE OF ARG-AAR-YAA-ARG-1-ZAA BONDS,
WHERE XAA CAN BE ANY AMINO ACID AND YAA IS ARG OR LYS.

1-1-COFACTOR: PACEAA IS PROBABLY CALCIUM-DEPENDENT.

1-SUBUNIT: THE PACEAA I PROCUSOR PROTEIN SEEMS TO EXIST IN THE
RETICULUM ENDOPLASMIC AS BOTH A MONOMER AND A DIMER-SIZED COMPLEX
WHEREAS MATURE PACEAA-I EXISTS ONLY AS A MONOMER, SUGGESTING THAT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          DOMAIN: THE PROPEPTIDE DOMAIN ACTS AS AN INTRAMOLECULAR CHAPERONE SSISTING THE FOLDING OF THE ZYMOGEN WITHIN THE BUDOPLASMIC RETICULUM. ISOFORM PAGE40 LACKS THE PROPEPTIDE DOMAIN. SIMILARITY: BELONGS TO PEPTIDASE FAMILY S8; ALSO KNOWN AS THE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        SIMILARITY: CONTAINS 1 HOMO B/P DOMAIN.
                                                                                                                                                                                                                                                                                                                                                      TERMINUS. PACE4B MIGHT BE SECRETED.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  JOINED.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               JOINED.
